DETAILED ACTION

Allowable Subject Matter

Claims 1 – 11, 15, 19 – 28, 32 – 38, 41 and 42 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: The prior art of Overbury does not teach or suggest the limitations of the claims. Overbury shows a switch arrangement comprising diode switches connected to a central point (Z) where the switches are spaced $\lambda/20$ (c1, Ins 27, 28) where the substitution of MEMS switches would have been obvious and is well-known in the art. Notwithstanding, while Overbury teaches connections for an RF port of each one of the Plurality of switches, Overbury does not teach or suggest the connections to a conductive via or a ground plane in the substrate (where Overbury provides no teaching or suggestion to either limitation).

Applicant's arguments, see page 10, filed February 2, 2007, with respect to claims 1 – 11 rejected under nonstatutory double patenting have been fully considered and are persuasive. The rejection of the claims has been withdrawn.

Conclusion
